

SmartphoneTradeIn.com Launched by Cell Phone Buyback Leader GRC Wireless

Trade-in used smartphones for cash, earn top dollar for over 200 smartphone models.

MIRAMAR, FL (PRWEB) May 28, 2012 – Cell phone buyback & recycling leader GRC Wireless announced the launch of SmartphoneTradeIn.com, enabling businesses, consumers, and organizations to [sell used smartphones](#) for cash.

SmartphoneTradeIn.com pays top dollar for over 200 smartphones, including Blackberry, iPhone, and Android smartphones. The company offers industry leading prices, free shipping, and issues payment within 2 days. Furthermore, the company commits to zero landfill processing and removes all personal data from phones.

"SmartphoneTradeIn.com is a great addition to our existing portfolio of cell phone buyback and recycling programs," stated Marc M. Leff, Co-Founder and Chief Operating Officer of GRC Wireless. "As smartphone users continue to upgrade phones at a rapid pace, SmartphoneTradeIn.com offers a great way to [sell smartphones](#) and earn top dollar."

The launch of SmartphoneTradeIn.com also marks GRC's 10th anniversary in the [cell phone buyback and recycling](#) business. "We have dedicated 10 years to providing buyback and recycling programs throughout North America," continued Marc Leff. "As the wireless market continues the shift to smartphones, SmartphoneTradeIn.com is well positioned to meet the trade-in needs of businesses, organizations, and individuals for years to come."

About GRC Wireless

Founded in 2002, GRC Wireless (www.grcwireless.com) has emerged as a leader in cell phone buyback, trade-in, and recycling. Through the company's *Shelter Alliance* (www.shelteralliance.net), *GRC Wireless Recycling* (www.grcrecycling.com), and SmartphoneTradeIn.com programs, GRC has responsibly processed over 5,000,000 cell phones since 2002, and participating organizations have earned over \$10 million through the collective programs. All cell phones and smartphones are processed through an environmentally responsible, zero landfill system.
